Administer at regular intervals (3-4 hours)  
Take the contents of the vials as it is presented or mix it in water or other beverages (e.g. milk, tea or juice)

Please see instructions below:

Break away 1 vials

Shake well before use

Twist cap to open

Squeeze to drink  
or mix with  
beverage  
e.g. milk, juice

5. Shelf life:  
2 years  
After opening, the preparation should be consumed within a very short period of time to avoid contamination of the suspension.
6. Special precautions for storage  
Store at a temperature not exceeding 30°C  
Away from light and moisture.

7. Nature and Contents of container  
Cardboard box containing 20 vials

### **What is Enterogermina?**

Enterogermina is a probiotic suspension in liquid form, constituted by 4 strains (SIN, O/C, T, N/R) of *Bacillus clausii* spores, a non-pathogenic gut microorganism, which contributes to the balance of intestinal flora.

The intestinal bacterial flora, also known as Microbiota, plays important role in the body, for example, helps to digest and absorb food, on cell renovation of intestinal lining cells, on immune response, on some vitamins production and constitutes a strong line defense against invaders.

According to World Health Organization, Probiotics when consumed in adequate amounts, confer a recognized health benefit on the host.

Administered orally, *Bacillus clausii* spore will ensure the probiotic arrives intact in the intestine, not damaged by gastric acid, therefore able to work in the targeted area, where they form a barrier against germs and/or offensive agents, contributing to the balance of intestinal flora. The *Bacillus clausii* also has a role in vitamins production, primarily complex B ones which able to enhance immune system.

Enterogermina has been use for decades in Europe, for restoring the balance of the intestinal flora and support immune system, also has been proven to be effective with good safety profile.

Enterogermina is a health supplement which contributes to the balance of intestinal flora, helps regulate digestive system and supports the immune system.

Convenient and practical use, Enterogermina is ready to drink, flavorless and can be mixed with water or other beverages, as tea, milk or fruit juices, making it easier for administration for children.

### **Other important information:**

The eventual presence of granules in Enterogermina vial does not means that the product has been damaged. They are clusters of *Bacillus clausii* spores therefore recommend to shake well before using.

The product **DOES NOT** contains sugars or gluten, may be used by Diabetic or Celiac person. There is also no significant quantities of calories.

Enterogermina can be used as a supplement for patients who are taking antibiotics, to help balance the microbiota. Its consumption should be associated with a balanced diet, healthy lifestyle.

**This product may not be consumed by immunocompromised (with deficiencies at the immune system) persons. If you have any concerns, please consult your pharmacists or physician.**
